Prosaro Fungicide for Wheat

Prosaro fungicide from Bayer CropScience gives farmers powerful activity on both leaf and head diseases for broad spectrum disease control. This superior activity delivers proven yield and quality increases under a wide range of environmental conditions.

Benefits
- Powerful performance against Fusarium head blight
- Proven deoxynivalenol (DON) reduction in harvested grain
- Increased grain quality and higher yields

Application Tips
- Timing – Early flowering (Feekes 10.51)
- Rate – 6.5 - 8.2 fl oz/A
- Adjuvant – NIS recommended for most uses.
- Use forward, forward and backward or bidirectional mounted nozzles. Typically 30° to 45°angle.
- Prosaro is compatible with most insecticide, fungicide, herbicide and foliar nutrient products.
- When mixing Prosaro with tank-mix partners,
  - Add ½ of the required water. Start the agitator running
  - Add in order: Wettable powders, dry flowables, liquid flowables, liquids, and emulsifiable concentrates.
  - Allow each tank mix partner to become fully dispersed before adding the next partner.
  - Add remaining water, keeping the agitator running.
- Apply a minimum of 10 gpa for ground and 5 gpa for aerial applications.
- Rainfast in 2 hours.
